

MURTAZA KHALID

Software Engineer | Java | Spring Boot | Microservices | Fintech & Payment Systems

Karachi, Pakistan | murtazakhalid888@gmail.com | 0346-8288815 | linkedin.com/in/murtazakhalid77 | github.com/murtazakhalid77 | murtazakhalid77.github.io

SUMMARY

Software Engineer with 3 years of experience building Java/Spring Boot backend systems for fintech, Digital Banking, logistics, and national payment infrastructure. Experienced in distributed systems, Event-Driven Architecture, REST APIs, Kafka, RabbitMQ, SQL databases, Docker, AWS, ISO 20022/SWIFT MT-MX messaging, RTGS settlement workflows, RAAST instant payments, secure authentication flows, and compliance-focused backend delivery.

TECHNICAL SKILLS

Languages: Java, SQL

Frameworks: Spring, Spring Boot, Spring MVC, Spring Security, Hibernate, Spring Batch, Liquibase

Architecture/APIs: Microservices, REST APIs, Distributed Systems, Event-Driven Architecture, OAuth 2.0/JWT, RBAC

Messaging/Streaming: Apache Kafka, RabbitMQ, Redis, AWS SQS, Store and Forward (SAF)

Databases/Cloud: MySQL, Oracle DB, SQL Server, AWS EC2/RDS/S3/SQS, Docker, Linux

DevOps/Tools: Git, GitLab CI, GitHub Actions, CI/CD Pipelines, Maven, Gradle, JUnit, Mockito, Postman, Jira, DBeaver, WinSCP, Keycloak

Banking/Payments: RTGS, RAAST, ISO 20022, SWIFT MT/MX, SBP Compliance, Payment Systems, Digital Banking

PROFESSIONAL EXPERIENCE

Software Engineer | Paysys Labs | Karachi, Pakistan | July 2024 - Present

- Engineered **production backend services** for **Pakistan's national RTGS and RAAST** payment platforms, supporting interbank settlement, instant retail payments, customer transfers, and regulated financial messaging under SBP standards.
- Contributed to **RTGS modernization** from SWIFT MT workflows to ISO 20022 MX-compliant messaging, improving alignment with national payment infrastructure modernization requirements.
- Built services to parse **SWIFT MT messages**, extract structured financial data, and generate **ISO 20022 MX** messages for payment infrastructure integrations.
- Developed RAAST P2P features for RAAST ID creation, linking, and delinking, Tile Fetch; supported **P2M** merchant APIs and **telecom bill** payment integrations for **Jazz and Ufone**.
- Implemented **Store and Forward (SAF)** reliability behavior and supported secure integrations using **Kafka, SQS, AWS EC2, S3, Spring Security**, and compliance-focused documentation.
- Worked on Digital Banks onboarding workflows with **NADRA BVS and CNIC** verification integrations for regulatory-compliant customer onboarding.

Trainee Software Engineer | Stepway Softwares | Karachi, Pakistan | August 2023 - June 2024

- Developed backend and web features for **logistics, e-commerce**, and data visualization systems, primarily a Gulf-based courier logistics management platform.
- Built admin/user panel workflows for parcel tracking, pseudo-customer generation, **role-based access control**, **bulk data processing**, and **pagination**.
- Designed a Spring Batch pipeline to **process bulk Excel files** and insert thousands of records efficiently; integrated automated email notifications for tracking and shipment IDs.
- Deployed and managed the application on an on-premises server, supporting release reliability, operational availability, and smooth delivery cycles.

SELECTED PROJECTS

- RTGS:** Backend services for **high-value interbank** settlement and financial message transformation using **Java, Spring Boot, ISO 20022, SWIFT MT/MX, Kafka, AWS EC2, S3, and SQS**.
- RAAST:** Instant payment infrastructure covering **P2P, P2M, bill payment APIs, RAAST ID lifecycle flows, SAF reliability**, and **SBP** compliance across **Pakistan's banking ecosystem**.
- SMSA Logistics System:** **Spring Boot/Spring Batch** platform for parcel tracking, **bulk Excel processing, RBAC, email notifications, MySQL**, and **AWS Linux deployment**.

EDUCATION

Bachelor of Science in Computer Science (BSCS) | Mohammad Ali Jinnah University | Karachi, Pakistan | September 2020 - July 2024 | CGPA: 3.5

ADDITIONAL PROJECTS

Lead Generation App: Flutter, Spring Boot, Angular | Point of Sale System: Java Swing, JavaFX | Bank Management System: Core Java | Hospital Management System: Android | Gym Management System for a local fitness center | Mobile Top-Up Management System for a retail easy-load vendor
